

# UPSKILL YOUR TEAM IN KANBAN

LEARN TOGETHER -  
APPLY TOGETHER

[www.kmm.plus](http://www.kmm.plus)

## USING KANBAN IMPROVES YOUR BUSSINESS:

### Employee retention

When you take people away from chaos, overburdening, and anarchy, they like it better and the stress level goes down and people feel happier.

### Increased productivity

Productivity is “how many items am I going to receive?” vs. “how fast?”. Our case study showed that improving from maturity level 1 to 4 using the KMM resulted in gains of 500% (4x).

### Faster teams

Speed is about reducing the lead time and it comes with focusing on flow. At advanced levels organizations shrink the lead time by 90%-95%.

### Loyal customers

You need to deliver on customer expectations to make them loyal. KMM helps to gain highly loyal customers through improving predictability.

### Better quality

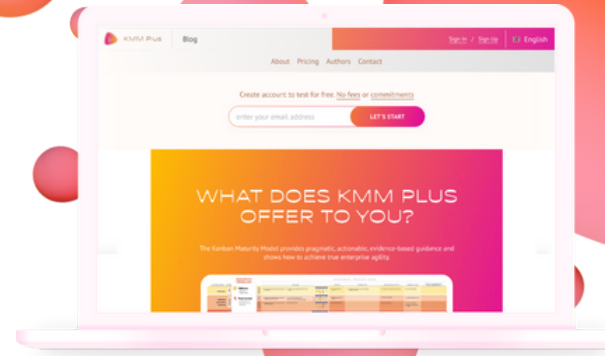

As soon as you remove the stress and anarchy things tend to get better. Kanban boards reduce individuals' multitasking and help people focus – improving quality.

### Respond to market changes

Market responsiveness requires us to be anticipatory rather than reactionary. Be able to recognize what is changing and how happy people are with your products.

# KMM PLUS

has all the most up-to-date content about the **Kanban Method** and the **Kanban Maturity Model**: books, interactive posters, downloadable materials, templates, learning modules, and more.
